BRITISH AND IRISH
ORTHOPTIC SOCIETY

VISION FOR YOUR FUTURE

Orthoptists are specialists in how
the eyes move and work together

They link the development of eyesight with how
the brain controls the eyes. It's cutting-edge stuff
and makes a huge difference to patients' lives. If
you enjoy science and want a career that matters,
orthoptics could be for you.

ME!

*Orthoptics isn't just the
theory and clinical skills you
learn from a textbook or
in a university but it is an
opportunity to bring your
personality to a career as
well. Patients respond best
when an Orthoptist shows
a genuine, human and
compassionate side.*
