BRITISH AND IRISH  
ORTHOPTIC SOCIETY

# VISION FOR YOUR FUTURE

Orthoptists are specialists in how  
the eyes move and work together

They link the development of eyesight with how  
the brain controls the eyes. It's cutting-edge stuff  
and makes a huge difference to patients' lives. If  
you enjoy science and want a career that matters,  
orthoptics could be for you.

ME!

*Orthoptics isn't just the  
theory and clinical skills you  
learn from a textbook or  
in a university but it is an  
opportunity to bring your  
personality to a career as  
well. Patients respond best  
when an Orthoptist shows  
a genuine, human and  
compassionate side.*
