VISION FOR YOUR FUTURE

**Orthoptists are specialists in how
the eyes move and work together**

They link the development of eyesight with how the brain controls the eyes. It's cutting-edge stuff and makes a huge difference to patients' lives. If you enjoy science and want a career that matters, orthoptics could be for you.

Orthoptics isn't just the theory and clinical skills you learn from a textbook or in a university but it is an opportunity to bring your personality to a career as well. Patients respond best when an Orthoptist shows a genuine, human and compassionate side.

Abbie

Neuro Orthoptist

Doing orthoptics gives me the chance to be able to help new people every day.

Emmanuel

Graduate Orthoptist
