

BIOS

BRITISH AND IRISH
ORTHOPTIC SOCIETY

VISION FOR YOUR FUTURE

Orthoptists are
specialists in how the
eyes move and work
together

They link the development of
eyesight with how the brain controls
the eyes. It's cutting-edge stuff and
makes a huge difference to patients'
lives. If you enjoy science and want
a career that matters, orthoptics
could be for you.

*Orthoptics isn't just the
theory and clinical skills you
learn from a textbook or
in a university but it is an
opportunity to bring your
personality to a career as
well. Patients respond best
when an Orthoptist shows
a genuine, human and
compassionate side.*

Abbie

Neuro Orthoptist

*Doing orthoptics gives
me the chance to be
able to help new people
every day.*

Emmanuel

Graduate Orthoptist
