Orthoptic Student Case Study

Meet Elisha

Elisha wasn't sure what to pursue at first but knew healthcare was the path. After researching different courses, she discovered orthoptics and reached out to her local department for work experience while still in sixth form.

What is a typical day like? In person lectures, not always a full day, then working from home.

Three words to describe the course? Engaging, insightful, informative.

What is the best part of your course? The application of theory into clinical practice.

What is the most challenging part? The placements integrated straight after uni theory and right before exams.

What skills/experiences have helped you? Communication.

Advice for prospective students?
Use placements to apply knowledge.

What are you looking forward to in your orthoptic career? The possibilities of advancing into specialised roles.
