Orthoptic Student Case Study

## Meet Sozan

My brother has cone dystrophy and regularly attended the orthoptics department at Sheffield Children's Hospital and now Hallamshire. When I attended these appointments, I was in awe of the clinical tests and how much goes into one report.

What is a typical day like? Lots of studying! But very academically rewarding.

Three words to describe the course? Intellectual, Hands-on, Exciting

What is the best part of your course? Clinical placements!

What is the most challenging part? Exams.

What skills/experiences have helped you? The ability to work as a team.

Advice for prospective students? Be prepared to manage a great workload.

What are you looking forward to in your orthoptic career? Working with children and specialising in SEN roles.
