

Orthoptic Student Case Study

Meet Yun Yee

Yun Yee's interest in neurology sparked a fascination with the eye and its connection to the brain, leading her to orthoptics.

What is a typical day like? Going to university for lectures, discussing case studies together and sharing knowledge with friends

Three words to describe the course?
Stressfully fun and interesting.

What is the best part of your course?
Going on placement and seeing interesting cases.

What is the most challenging part?
Commuting and finding accommodation for placement which are within budget.

What skills/experiences have helped you?
Professionalism, passion for expanding knowledge.

Advice for prospective students? Get out of the comfort zone and embrace changes, enjoy the journey even if it can be difficult.

What are you looking forward to in your orthoptic career? There are endless opportunities to further develop my career in terms of academic and clinical practice.
